

CARE AND INSTALLATION INSTRUCTIONS

CARE INSTRUCTIONS

US ENGLISH

KALDEWEI steel enamel

- After use, rinse the enamel surface with water and wipe with a soft, damp cloth, chamois or sponge.
- Dry dark coloured products after use to prevent calcium build-up.
- Remove small stains with a regular household detergent or a mild all-purpose or bathroom cleaner; soak heavier stains before cleaning. Always follow the instructions on the cleaning product.
- To avoid calcium deposits, ensure that all fittings are properly sealed and that all water is removed after use. Any deposits that do occur despite these efforts can be removed with a lukewarm 1:1 mixture of water and vinegar (do NOT use concentrated vinegar). After cleaning, rinse the surface thoroughly.
- Personal hygiene products containing naturally occurring oils or fats, such as hair conditioners, shower and bath oils, may leave residue on the enamel surface that will increase the risk of slipping. Use a fat-removing alkaline cleaner to remove these stains and follow up with an acidic cleaner before rinsing the surface with clean water.
- When using a drain cleaner, please read the manufacturer's instructions carefully and pour the cleaner directly into the drain. Take care not to splash drain cleaner onto the enamel surface and remove splashes promptly.
- Always observe the care instructions for the fittings on your product.
- Do not use coarse, abrasive cleaning products, strong acidic or alkaline cleaners (e.g. concentrated vinegar, chlorinated alkaline cleaners), steel wool, scouring pads, laundry detergents and washing powder or laundry detergent/washing powder suds.
- KALDEWEI CARE accessories (may vary by region): For occasional more thorough cleaning use the KALDEWEI Enamel Cleaner or the KALDEWEI Special Enamel Cleaner for heavier staining.
- Surface damage caused by incorrect treatment can often be repaired using the KALDEWEI Enamel Pen or the KALDEWEI Enamel Set.

Easy-clean finish (standard finish for washbasins, optional for bathtubs and shower trays/surfaces)

- The same care instructions apply as for our KALDEWEI steel enamel. In addition, carefully observe the following cleaning instructions.
- Do not use microfibre cloths.
- Under no circumstances should mortar, tile adhesive or joint filler, building dust, sand and other abrasive materials be allowed to come into contact with the surface finish.
- KALDEWEI CARE accessories (may vary by region): The KALDEWEI Enamel Cleaner is NOT suitable for use on surfaces with easy-clean finish. For heavier soiling, use the KALDEWEI Special Enamel Cleaner.

Full anti-slip (for bathtubs and shower trays/surfaces)

Caution! Soiling can impair the non-slip effect of these surface finishes. In order to retain the special surface texture, care must be taken to ensure proper care and cleaning.

- The same care instructions apply as for our KALDEWEI steel enamel. In addition, carefully observe the following cleaning instructions.
- After cleaning, rinse the surface with plenty of water and dry with a shower or window squeegee. Remove stubborn stains using a soft hand brush.
- Do not use non-lint-free cloths or moist disposable wipes.
- KALDEWEI CARE accessories (may vary by region): The KALDEWEI Enamel Cleaner is NOT suitable for use on surfaces with non-slip properties. For heavier soiling, use the KALDEWEI Special Enamel Cleaner.

INSTALLATION INSTRUCTIONS

Note!

- Please read and observe the safety information and assembly instructions enclosed with the product or installation system.
- Always use the original packaging for transportation of the product. Treat with care and ensure proper handling during transport, unpacking and installation.
- Fit steel enamel products during the fine installation stage and cover until all building work has been completed.
- During installation, ensure that the enamel surface does not come into contact with any metal. This includes the installation of appropriate waste fittings or waste and overflow fittings with double lip seal.
- When using accessories or products from other manufacturers check for suitability and follow the manufacturer's instructions.
- Prior to installation, check the product for dimensional accuracy, colour, proper functioning and defects.
- Once the product is fitted and connected, carry out a water drainage test ensuring that all residual water drains completely before permanent installation.
- Before applying the elastic joint seal, weigh down the bathtub or shower surface. Do not remove the weight until the seal has fully cured.
- KALDEWEI cannot be held responsible for additional costs resulting from defects which are apparent before the installation. It is the installer's responsibility to test the unit and to inform his contracting partner of any faults. Breach of this duty may result in loss of the right of recourse.
- For easy and safe installation of the units, KALDEWEI offers a comprehensive range of accessories based on product and model as well as various sound insulation sets (may vary by region).

Attention!

- Always comply with national and regional standards and regulations relating to bathroom fittings and electrical installations and to fire safety as a matter of priority. The same applies to national accident prevention regulations.
- Ensure proper stabilisation, bearing capacity and structural stability and use appropriate mounting hardware for wall or floor fitting.
